## STONE COATED METAL ROOFING TILES

these Tiles are made from a galvanized steel plate and zinc aluminum with an anti-corrosion layer and a surface of colorful stone chips. offering excellent weather resistance, Atone-Coated metal roof tiles are both durable and lightweight. they are easy to install and provide superior protection in harsh environments.

### ADVANTAGES OF STONE COATED METAL ROOF TILES

Lightweight	Weights only 6 kg/m <sup>2</sup> , reducing structural load.
Easy Installation	Large units allow for quick installation.
Wind Resistance	Tower-type installation ensures windproof performance.
Waterproof	Fewer gaps enhance waterproofing, ideal for rainy climates.
Fireproof	Made from natural basalt with a class A fireproof rating.
Noise Reduction	Colored stone surface minimizes rain noise.
Energy Efficient	Features above-sheathing ventilation.

Grade on Roofing

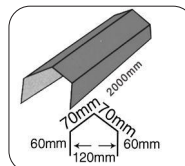

Stone coated steel roof tile is made from galvalume steel and zinc aluminum then coated with stone chips and attached to the steel with an acrylic film. The result is a more durable roof that still retains the aesthetic advantages of high end roofing such as classical or shingle tile. Stone coated steel roof is considered by many to be the most durable and long lasting of all metal roofs, which are also energy efficient and extremely environmentally friendly.

## ADVANTAGE OF TYLIZ SHINGLES

### PREMIUM PRODUCTION LINE

Tyliz has the advanced production, its design improved the efficiency of sticking two layers. And we have the technology of double strips and cutting-edge technology of environment isolation.

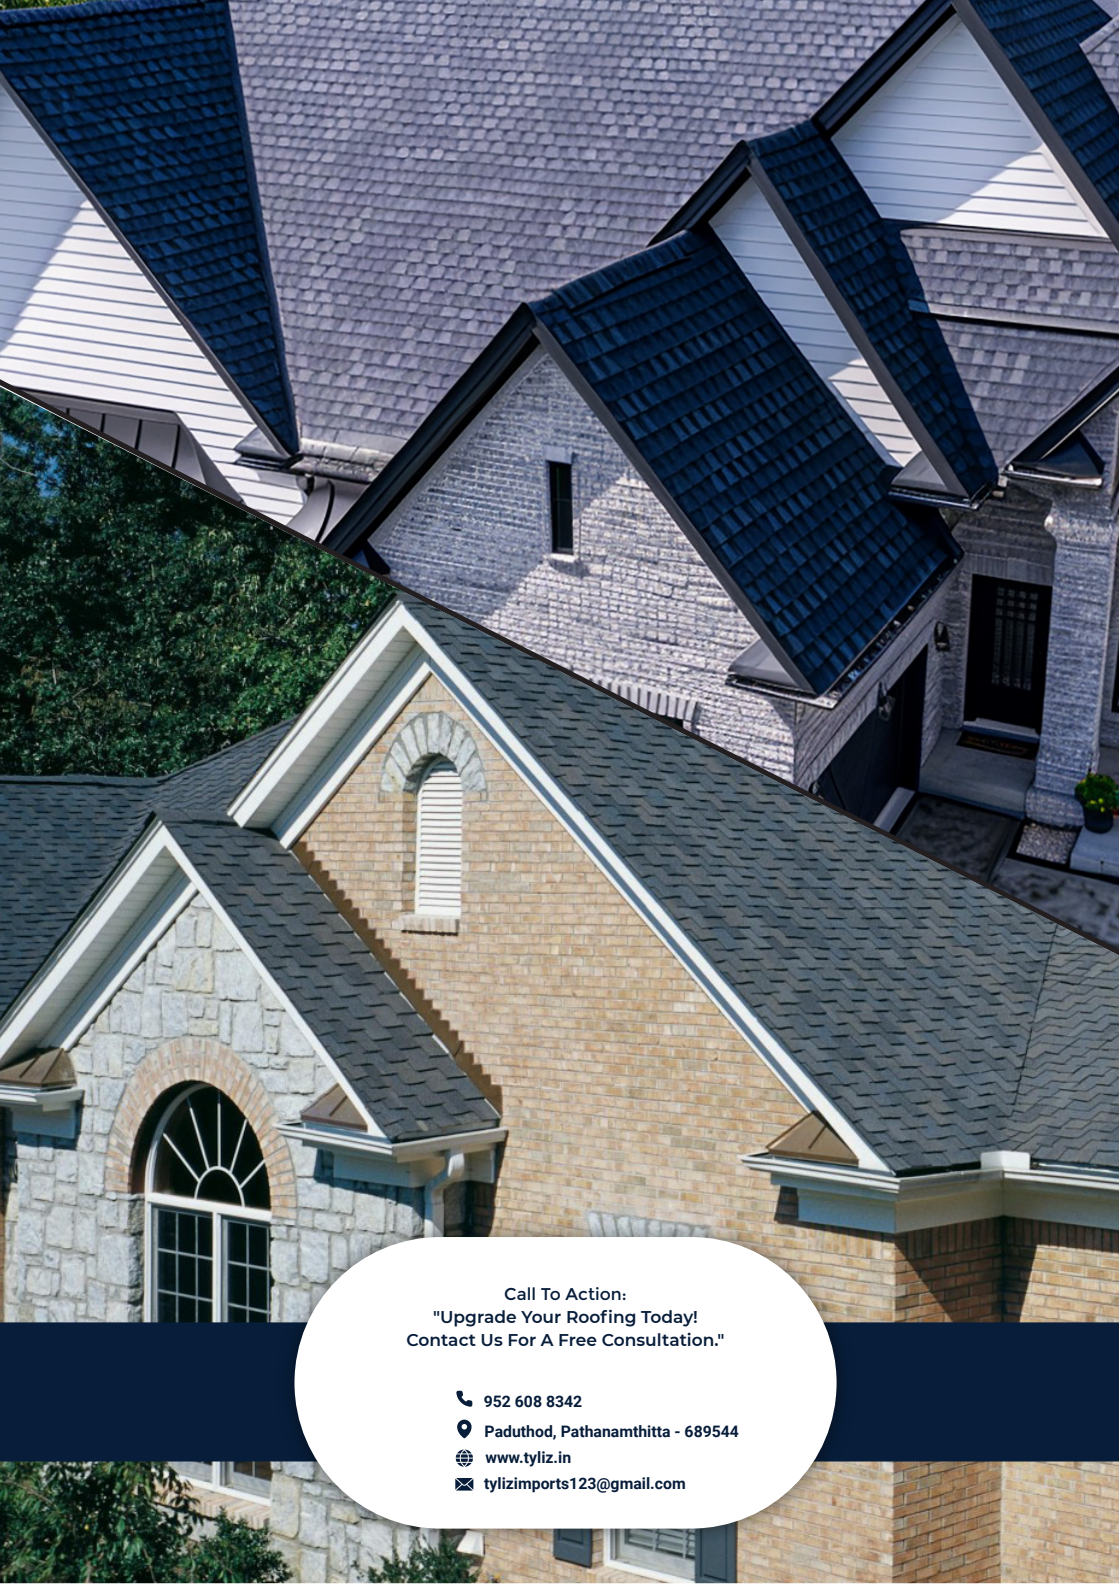

### UNIQUE SANDING BLAST TECHNOLOGY

We choose colored stone sand with brand, which is better than ordinary sand.

### PREMIUM ASPHALT

We use the raw material of high-quality modified asphalt. it makes asphalts shingle more stable and solve the problems like flowing in high temperature and crack in low temperature.

No.	Measurement	Normative Value
1	Length (mm)	1000 = 2
2	Thickness (mm)	5.8 = 2
3	Width (mm)	340 = 3
4	Number Of Layers In A Shingle	2
5	Overlap index	2
